

CS118 Programming Assignment

Hello World

MOST PEOPLE SHOULD CREATE AND SUBMIT THIS PROGRAM IN CLASS

Prepare a Python program which will – using a single call to the `print()` function - print to the command window the words “Hello, World!” followed by **two blank lines**, and then print to the command window the words “I'm glad to be here!” (don't forget the apostrophe!) *with the command prompt showing up on the next line*. See the example output below:

```
Python Shell
File Edit Shell Debug Options Windows Help
Python 2.7.3 (default, Apr 10 2012, 23:31:26) [MSC v.1500 32 bit (Intel)] on win
32
Type "copyright", "credits" or "license()" for more information.
>>> ===== RESTART =====
>>>
Hello, World!

I'm glad to be here!
>>>
```

Don't forget your affirmation!

This is the **only** program which can be re-submitted – you can submit as many times as you like until you receive full credit.
